

Adolescent Substance Use (ACRA)

Teens who use drugs and alcohol need support, skills, motivation and opportunities to make better choices. We help get them on the **right track**.

Being a teenager today is tough—and some teens turn to substance use. Our Adolescent Substance Abuse Treatment is a six-month program designed to help teens replace alcohol or drug use with positive social activities and behaviors. By helping teens understand how substance use is negatively impacting their lives, we work with them to set goals, learn new skills and make positive choices.

PRACTICAL SKILLS FOR POSITIVE CHANGE

We use a highly successful Adolescent Community Reinforcement Approach (A-CRA) to treat teens, aged 12 – 18, who are dealing with substance use and dependency. Teens learn new ways of handling problems without drugs and alcohol by focusing on the rewards of staying substance free. Sessions cover a range of skills such as problem solving, communication, understanding the role of substance abuse in their lives and drug refusal. We encourage active participation in appropriate activities. Having skills and positive activities reinforces sobriety by meeting important life needs in a healthy way. The majority of adolescents participating in the program show significant improvements in their behavior.

Treatment begins with a comprehensive assessment followed by 10-12 individual sessions (3 months). These sessions include looking at the place drug and alcohol use has in their present life and its impact on their future. Enrolled teens will learn and practice new skills, making positive choices and setting goals. Parent and family sessions are part of the treatment.

The second phase of treatment (3 months) reinforces skills learned by practicing them in the real world. This phase adds case management, home visits, and support in the community.

ADOLESCENT SUBSTANCE ABUSE TREATMENT GOALS INCLUDE:

- Increasing and reinforcing involvement in positive behaviors
- Finding healthy peer groups and activities
- Promoting abstinence and preventing relapse
- Teaching teens how to communicate effectively
- Helping families and caregivers to change the cycle of negative interactions with their teens, understanding how their behavior and communication impacts adolescents' substance use
