Substance Screening, Treatment Recovery for Youth (SSTRY)

Teens and young adults who use drugs and alcohol need support, skills, motivation and opportunities to make better choices. We help get them on the right track.

Being a teenager and young adult today is tough—and some turn to substance use. The SSTRY program is an eight-month program designed to help replace alcohol or drug use with positive social activities and behaviors. By helping to identify how substance use is negatively impacting their lives, we work with them to set goals, learn new skills and make positive choices.

PRACTICAL SKILLS FOR POSITIVE CHANGE

We use a highly successful Community Reinforcement Approach model (CRA) to treat teens and young adults, aged 12 – 24, who are dealing with substance use and dependency. They will learn new ways of handling problems without drugs and alcohol by focusing on the rewards of staying substance free. Sessions cover a range of skills such as problem solving, communication, understanding the role of substance use in their lives and drug refusal. We encourage active participation in appropriate activities. Having skills and positive activities reinforces sobriety by meeting important life needs in a healthy way. The majority of teens and young adults participating in the program show significant improvements in their behavior. Treatment begins with a comprehensive assessment followed by individual sessions over the course of eight-months. These sessions include looking at the place drug and alcohol use has in their present life and its impact on their future. Enrolled teens and young adults will learn and practice new skills, making positive choices and setting goals. Parent and family sessions are part of the treatment where applicable.

CHR’s team includes experienced clinicians that will provide treatment in an outpatient setting and Recovery Support Specialists providing case management, home visits and support in the community.

SSTRY TREATMENT GOALS INCLUDE:

- Increasing and reinforcing involvement in positive behaviors
- Finding healthy peer groups and activities
- Promoting abstinence and preventing relapse through harm reduction
- Teaching teens and young adults how to communicate effectively
- Helping families and caregivers to change the cycle of negative interactions amongst the family by understanding how behaviors and communication impacts substance use
