

Intensive Outpatient Program for Adults

Living with behavioral health issues is a deeply personal struggle. At CHR we believe there is hope through support and recovery.

Gaining control of your life is possible through CHR's specialized Intensive Outpatient Programs (IOP) for adults struggling with mental illness, substance use, depression and post-traumatic stress disorder. IOP offers a high level of treatment and care that is trauma-sensitive and gender-responsive for three hours per day and up to four days per week. We help individuals reach recovery and find hope through group therapy, education about mental illness and substance use, cognitive and behavioral coping strategies, family interventions and medication management. These programs are open to individual's families for education, support and collaboration in treatment planning and run for approximately 4-5 weeks.

Women's Intensive Outpatient Program:

The Women's IOP is a gender-responsive and trauma-sensitive treatment program. The services are provided by female therapists who are experts in how trauma effects women's behavioral health due to cultural and social circumstances. Therapeutic interventions are provided in a caring and empowering environment to engage women in gaining wisdom and strength to make decisions that enhance growth and health. Women who experience addiction, relationship stressors and mental health symptoms that interfere with personal goals will benefit from this program.

Men's Intensive Outpatient Program:

The Men's IOP is a gender-responsive and trauma-sensitive treatment program. The services are provided by male therapists who are experts in how trauma effects men's behavioral health due to cultural and social circumstances. Therapeutic interventions are provided in an environment that is sensitive to how traditional gender role expectations shape male clients beliefs, values, and expectations for treatment. Men who experience addiction, relationship stressors, and mental health symptoms that interfere with personal goals will benefit from the program.

Intensive Outpatient Program for Men and Women:

This program intervenes to prevent individuals' behavioral health symptoms from progressing or relapsing. Individuals discharging from inpatient psychiatric or substance use treatment can use this program to help transition back into the community.

Please call our Triage Center at 1.877.884.3571 for information about where IOP treatment is offered and to schedule an appointment.
